5610.1

Research

The Board recognizes the need and value of educational and psychological research which develops, validates, and standardizes newer programs and strategies in education. The Superintendent and his/her staff shall be encouraged to participate in and cooperate with such projects. In order to eliminate duplications and overlapping and to insure that results are available and disseminated adequately, all research and experimental projects using staff, pupils, or materials within the District must receive prior approval from the Superintendent.

Revised February 19, 1996
